

Jan Mirecki • Frontend Developer

I am a **Frontend Developer** and a **Product Designer**. I graduated in Product Design and after 4 years of professional experience as a **UI & UX designer**, I switched to a **full-time developer** role in 2015.

I work mostly with **React, TypeScript & UI Design**. I'm interested in **high-quality** projects focused strongly on the design, dedicated to regular internet users. I would be particularly happy to cooperate on a **design system project**. Other fields of my current professional role interests: **QA, PM**, and **Product Designer**.

In May 2024, I moved from Warsaw to Oslo, and since September last year, I have been learning Norwegian. I love Norway for its landscapes and vast mountain trails, and it was here that I caught my first fish early this spring 🐟.

In my free time, I like to tinker, support friends with their projects, ride my **motorcycle**, **climb**, **ski**, and **travel** in my **homemade micro rv**. Recently, I started learning to skateboard, which brings me a lot of joy. I am very fond of **coffee**, **kombucha**, and **bread** of my own baking.

Jest • React Testing Library • Webpack • Parcel • JIRA
git • git hooks • npm • yarn • husky • eslint • prettier • bash • zsh

🏢 UX & UI

Figma • Framer • Illustrator • InDesign • Photoshop • InVision Studio • Sketch

🚀 More

Arduino • Lego Mindstorms • Adobe Scripting • ...

Experience

Aug 2022 – Now

SZTORM

 *Own Business › Senior Frontend Developer › Consultant › Architect*

As a freelancer I'm cooperating with various parties, supporting commercial and non-profit projects. I have worked on projects supporting refugees. I organized a group of IT volunteers called WebScouts and supported more or less formal NGO organizations and grassroots initiatives. Together, we took part in accelerating the delivery of a Polish government website to support Ukraine. I led UX design exercises at the SWPS University in Warsaw, Department of Psychology and Computer Science. Commercially, I worked on the SAP UI for the US-based company – Corevist as a React Developer. Previously, I coordinated the redesign project of the web and mobile platform for Biletomat.pl, part of the Time For Friends Company. In this role, I led a team of designers, developers, and marketing professionals from a technical, coordination, and visual perspective, reporting directly to the company's management. Currently, I am coordinating work on a reservation system for facilities, where I am responsible for the frontend, design, and project management.

*Ebert Studio › SWPS University › Biletomat.pl › Imagine › Corevist › Techlab EE
pomagamukrainie.gov.pl › Fundacja Konflikt › Daydream Yachting*

IT volunteering • Tech Leading • Frontend Development • Design Consulting • University Lecturer

Aug 2019 – Aug 2021

CD Projekt Red

 *Senior Frontend Developer › Tech Lead*

Leading the team for designing and implementing a game (GWENT) Admin Panel in React Typescript integrated with the existing backend environment and creating tools for game management in a variety of frontend technologies. I was tech leading the team of 2 Frontend Developers (me + 1 mid/regular FD) and 3 Backend Developers (PHP). I was responsible for setting the development directions for the platform, writing documentation and manuals, leading the knowledge-sharing sessions for backend devs who were new in a React Frontend environment, and sharing our progress in front of the ~100 members of the Gwent Team on monthly meetings.

React TS • Redux • Saga Middleware • Typescript • Ant Design • Jest • React Testing Library • PHP • Symphony • Docker

Jan 2019 – Aug 2019

Sztorm Jan Mirecki
